

Dear Valued Customers,

17 Dec 93

Enclosed is the updated listing of errata for all 17 of our games to date. This kit also contains the variant countersheet issued in December 1992.

The countersheet contains all the re-placement counters for every counter error we have ever made. Also, they include redone Soviet Tank units for **Guderian's Blitzkrieg** (redone because I didn't like the way they looked).

The replacement Panzer Lehr (for **Omaha**) is included in two ways—first are the repl counters for the game as it stands. To use the second level of Panzer Lehr, delete the Jagd-Tigers, Panthers, Hummels, and Mk. IVs from the game's OOB and add only the units given here.

The **Stalingrad Pocket** unite are variants which support the article by James Meldrum in *Operations* #6.

Good Luck and Great Gaming!

Keep the faith and Keep 'em Playing!
