

1998 Repl Counters

- The first counters are replacements for Vanity counters from last year's sheet for the owners who did not get what they wanted in the first attempt.
- The TCS aircraft are those needed to finish out the totals needed on all TCS games. Add these to the ones from last year.
- F-AH is the final replacement for Field's Brigade for Gaines Mill.
- The Arty-18 Infantry Gun is a replacement for Semper Fi!
- The 21 Aus Bde is actually a replacement for the counter in Afrika (after all these years...)
- The 18-V-GD company is a replacement for the one in GD'41.
- The next two big batches replace or add all the counters needed to correct the problems in Semper Fi! And A Raging Storm.
- The last 5 unit counters are the last replacement counters for Stalingrad Pocket II. (Again, finally.)
- The lettered dumps are for use in any OCS game. Simply place this dump on the map and jot down elsewhere how many SPs are in it. That way, the enemy will not be able to identify a huge dump by the size of the stack. You could also use these as dummies...without any SPs in them at all.
