Soviet Repls

Two Dice:	Fighter	Other Air	Pax	Eq	Truck	Arty	Emergency

11	2	2	6	2	1	1	2
12 or more	3	2	6	3	2	2	2

Roll once for any combination of complete or short-sheet map sets in play.

Modifiers:

-1 1941

+0 1942

+1 1943

-3 if Moscow German Held

✓ If not all mapsets in play, roll one die for each Repl point. On a 1-3 it goes to **GBII**, on a 4-5 it goes to **EatG**, on a 6, it goes to the mapsets containing the Main Effort. If only **CB** is in play, a roll of 6 sends the Repl to the **CB** maps.

The Russian player gets to roll **twice** on his Variable Reinforcement Table each turn if there are Germans north of the Don River between EatG **C7.26** and **C46.07** (inclusive).

Air Repls:

- Result is the number of aircraft that can be recovered to full strength. Eq Repls cannot be used to rebuild aircraft in this game.
- Air Repls must be used the instant they are awarded. If no such aircraft exists that can make use of the repl, it is wasted.
- If Verkhniy Baskunchak (**Case Blue** E14.10) or Astrakan (one or both) is occupied by Germans, reduce Aircraft repls by 1.

Fighters: Yak-1, LaGG-3, MiG-3, Yak-7b, P-40, P-39, Hurri-II, La-5, Yak-9

Other: All other aircraft

Not rebuildable: SB-2, I-15, I-16, G-2, TB-3, Su-2

✓ **Trucks & Arty:** Add this number of Truck Points as reinforcements (not limited by the dead pile). Allows this many rebuilds of Arty (including Katy) Brigades. If none are dead, none rebuild.

Emergency: Release this number of unit counters (regardless of size or type) from the Emergency Reinforcement Pool.

Soviet Rail and Sea Caps

Black Sea Shipping can be used in the Sea of Asov if the Soviet player controls both sides of the Kerch Straits.

in all such cases, the terrain effect is [x1/4]

“Normal” weather is everything except Lt Mud or Mud.

Use **Normal** for calculating Draw, Throw and Extender MP counts, regardless of weather. Exception: Use Frozen types if available.

Trucks can load or unload in place, regardless of the weather effects above. Trucks finding themselves locked down due to weather in P terrain, remain in place unaffected, but cannot move and are destroyed if forced to do so.

*—For German Tracked units, apply the MP cost before the dash (if any), Russian ones use the value after the dash.

Notes:

- 1) Where an entry reads "Po.2" or "Truck Point" it is assumed that the entry means One of said item. If more than one is called for, it will be explicitly listed, such as "2x Truck Points"
- 2) Entries specify the map set for the reinforcements. Only use the entries for the full or short-sheet game sets you are using.
- 3) Ignore "Transfers" if both sets of maps are in play. If only one of the map sets is in play, apply as a removal if the listed units are leaving the play area or apply as a reinforcement if the units are entering the play area. Ignore the entry entirely if neither map set is in play. "Partial" map sets count as being in play.
- 4) Transfers can be made using units from the dead pile.
- 5) Transfers must enter their new map set using road or rail hexes forming the connection between the two map sets in question. In other words, they move onto the new map set in a way that would make sense if you were actually moving them from game map to game map.
- 6) You are free to use identical units for removals and transfers, but unless the actual historical unit is used, the unit chosen cannot be from the dead pile.
- 7) Withdrawals and removals occur regardless of where the unit might be or what the unit's condition might be (even dead). The player must either withdraw the named unit from wherever it might be, or an identical unit from the maps specified. In other words, you can't avoid a withdrawal by shifting units between map sets.
- 8) Units that are removed cannot be rebuilt.
