

# Stand Alone Revised GBII—15 Dec 14

Mike Willner & Joey Sabin have alerted us to quite a few counters from Case Blue that are needed to play the GBII scenarios as they appear in Case Blue and its scenarios reproduced in in the second printing of GBII. They are different from the intended stand alone GBII scenarios.

When playing using the Case Blue rules and scenarios, you have the needed units in your Case Blue game. In that case, use the Case Blue & revised GBII set ups and OOAs.

If you do not have Case Blue, use the GBII set ups and OOAs with the adjustments below. The OOA lists are included to save time looking.

## Quick GBII to CB conversion for Campaigns 7.1 to 7.4

1. For the 7.1 setup, use a 3-2-2 Brkdw for the 3-2-3 Mot Inf Rgt (3) and (5)-1-1 UR Bde (5) below.

A29.29: 3-2-3 Mot Inf Rgt (3)

Setup with any Russian Unit: (5)-1-1 UR Bde (5)

Ignore the extra dead and emergency reinforcements, which are:

Russian Dead Units: 3-1-2 NKVD Inf Rgt (37), 12-2-2 Inf Div (223)

Emergency Reinforcements: 12-2-5 Mot Inf Div (36 (m)), 12-2-5 Mot Inf Div (57 (m))

2. Ignore the extra Axis and Soviet reinforcing ground units listed below. For the extra Soviet air units listed below, substitute air repl of that specific type (which can be saved for later use).

3. On 1 April '42 the southern play boundary shifts north by 1/2 a map (do this during Weather Determination). So for the rest of the game, all hexes on or south of Map C/F xx.18 are out of bounds. Any air or combat units that are currently south of the new play boundary are immediately

pulled from the map and added to the future reinforcement arrivals as if they made a successful breakout roll (so they retain any steps lost and low-ammo markers, and arrive in 1d6 turns). Note this *does* include units that are surrounded, but does *not* include non-combat units (SPs, airfields, hedgehogs, and transport points).

4. For victory determination at the game's end, assume the Germans hold the VP cities in the area that is out-of-bounds: Voronezh and Staryy Oskol (8 points combined).

5. Reduce each side's supply column by -1 from 1 April '42 on.

## Quick GBII to CB conversion for Campaigns 7.6 to 7.8

1. Ignore all the missing Axis and Soviet ground units. For missing Soviet air units, substitute air repl of that specific type (which can be saved for later use).

2. The bottom 1/2 of Map C and Map F is out of bounds. Ignore setups of units in or south of row xx.18.

3. For victory determination at the game's end, assume the Germans hold the VP cities in the area that is out-of-bounds: Voronezh and Staryy Oskol (8 points combined).

4. Reduce each side's supply column by -1.

Abbreviations Used:

(ERP) = Emergency Pool (TCB) = Transfer from Case Blue (UEX) = Unit Exchange
