

## Operational Combat Series: Consolidated Errata, Clarifications, & House Rules

### 4-15 Tunisia II (24 June 2016)

#### Scenarios

1. In Scenario 2, 78th Divarty should setup in Algiers.

#### Allied Arrival Card

1. Should be 3-3-~~Z~~ US Recon on 29 December.
2. Should be ~~3~~x P-39 on 1 January.
3. Should be ~~3~~-5-3 US Cdo on 1 February.

#### Axis Arrival Card

1. Should be (7)-~~4~~-3 LW Flak Bn (I-33) on 5 February.

#### Those Extra BTR French Counters...

1. The counter is correct for 2D. The armored cars were upgraded to tank destroyers during the campaign.
2. For Nord, the 3 TM should be in D13.35.
3. The new counters are additional FR units (they do not replace breakdowns, etc.).

#### Clarifications

1. The AEP locations have been intentionally changed (from the old game) so the Axis cannot build a base within half range of Ju-52s flying from Sicily.

### 4-16 Sicily II (24 June 2016)

#### Scenarios

1. 6 & 61 CD have extra "C" after numbers (Scenario 4).
2. Bedo is listed as Mx, but is actually AG (Scenario 5).

#### "Learning The Ropes" article...

1. On p. 9 a mistake was made by the copy editor in modifying Ric's article to fit some changes in the scenario. That "1st Airborne unit that just dropped" could **not** join the Exploit Phase attack (it is neither a released reserve nor exploit-marked). So the odds should be 7.5 to 3.5, or 2:1. Catania would still be captured, but end positions after retreat and advance would be slightly different.
